Description

A great match for sensitive skin or long-stay patients of up to 3 weeks, our premium SATO Thermal Transfer (TT) Line Wristband is soft yet durable for optimum performance and comfort and is available in a range of colours.

Thermal printing technology delivers a crisp and robust print to the extra-soft anti-microbial embossed wristband to ensure that patient data remains legible throughout the duration of their stay.

The wristband is ideal for infants or the elderly due to its gentle nature, the wristband is secured with a soft, antimicrobial clip for security and to remove the risk of transference. In addition, unique to the SATO wristband, is a security ribbon that conceals patient ID for additional peace of mind.

Key Features:

- Crisp and durable thermal transfer print method (requires ribbon)
- Security ribbon to conceal patient ID
- Extra-soft, synthetic material
- Embossed to support skin aeration
- Secure clip closure with antimicrobial technology
- Latex and Iron-oxide free, water, soap and solvents resistant
- Non-skin irritant (tested in laboratory based on ISO standards)
- Adult, infant and maternity options available
