

CT\$-LX Series | 4" Desktop Printer

An example of true SATO innovation and 'ceaseless creativity', the intuitive CT4-LX printer is the perfect blend of compact dimensions and powerful performance. Designed to save time for operators and significantly increase efficiency in fast-paced business environments, the printer utilises thermal and direct thermal printing up to 104mm width in tear-off or continuous operation. The CT4-LX is ideal for a wide range of practical commercial applications, including price labelling, inventory management and shipping labels. The innovative printer has industry-leading emulation formats that enable the CT4-LX to integrate seamlessly into existing workflows, saving time and money throughout the value chain. RFID capability HF/UHF is also a key feature of the printer, providing heightened flexibility, large data storage capacity and increased data collection throughput, along with greater immediacy and accuracy of data collection.
