

DS3608

As a member of the Zebra Ultra-Rugged 3600 Series of scanners, the practically indestructible 1D/2D DS3608-HD corded and DS3678-HD cordless scanner is ready for one of the world's toughest environments — the electronics manufacturing production line. You get the truly unstoppable performance you need to prevent the high cost of unplanned production line downtime. Your workers get first-time every time capture of the many types of small and high-density barcodes printed on the components in the products you make. And since these scanners also capture standard barcodes in virtually any condition, you get a real value — unstoppable performance in a single flexible device that can meet scanning needs from the assembly line to the warehouse.

Description

In addition to superior scanning performance, flexible information capture, an ultra-rugged design and unparalleled manageability, you get more features that help these scanners capture every high-density barcode on the first try. From very low contrast barcodes that are etched directly onto parts to very high contrast white codes printed on black, or black codes printed on white, the DS3608-HD and DS3678-HD do it all

BATTERY

PowerPrecision+ 3100 mAh Li-Ion rechargeable battery
(For cordless models)

SCANNING TECHNOLOGY

Array Imager

SEALING

Scanner: IP65 and IP68 Cradle: IP65

DROP TOLERANCE

Withstands multiple 10 ft. / 3.0 m drops to concrete

DECODE CAPABILITY

1D and 2D
