Description

Unstoppable performance for high density 1D/2D barcodes

As a member of the Zebra Ultra-Rugged 3600 Series of scanners, the practically indestructible 1D/2D DS3608-HD corded and DS3678-HD cordless scanner is ready for one of the world's toughest environments — the electronics manufacturing production line.

You get the truly unstoppable performance you need to prevent the high cost of unplanned production line downtime. Your workers get first-time every time capture of the many types of small and high-density barcodes printed on the components in the products you make.

And since these scanners also capture standards barcodes in virtually any condition, you get a real value — unstoppable performance in a single flexible device that can meet scanning needs from the assembly line to the warehouse.

- **Superior Performance**

You get the ultimate in scanning performance — period. Your workers can capture virtually any high-density and standards 1D or 2D barcode at lightning speed, regardless of whether it is printed on a paper label or directly on a product component. Even if barcodes are damaged, dirty or poorly printed, no problem — this intelligent scanner can handle it all.

- **ULTRA-Rugged Design**

The warehouse and manufacturing plant floor is as tough as its gets. That's why we created a new product category — the ultra-rugged scanner. The corded and cordless models are the only scanners in this class that are dust-tight, sprayproof and waterproofed to IP67, with an IP65-sealed cradle for a complete rugged cordless solution.

- **Unrivaled Manageability**

With our complimentary industry-best tools, managing these scanners couldn't be easier. You can remotely configure and upgrade your scanners, format data properly for instant transmission into your business applications, monitor battery statistics for your cordless models and more.

Get it on the first try

In addition to superior scanning performance, flexible information capture, an ultra-rugged design and unparalleled manageability, you get more features that help these scanners capture every high density barcode on the first try. From very low contrast barcodes that are etched directly onto parts to very high contrast white codes printed on black or black codes printed on white, the DS3608-HD and DS3678-HD do it all.

- **BATTERY**

PowerPrecision+ 3100 mAh Li-Ion rechargeable battery
(For cordless models)

- **SEALING**

Scanner: IP65 and IP67
FLB cradle: IP65

- **DROP TOLERANCE**

Withstands multiple 8-foot / 2.4-metre drops to concrete

- **DECODE CAPABILITY**

1D and 2D

- **SCANNING TECHNOLOGY**

Array Imager
