Gryphon I GD4500

The Gryphon 4500 imager is an extremely powerful and beautifully designed handheld scanner that perfectly fits your grip. Its balanced, ergonomic shape reduces operator fatigue ensuring he/she continues to use it throughout the day effortlessly. Housed in the body is a rich feature set and high-performance megapixel sensor for outstanding reading results. Even during operation, the distinctive warm white illumination and use of Motionix motion sensing technology make this a very intuitive and easy to use scanner. What's more is that the scanner is available in both wired and wireless versions. The wireless version offers battery inductive charging without the need for physical contacts. An easier to use, lower maintenance version of an already highly desirable scanner. Used in retail, healthcare, manufacturing, and commercial services. The Gryphon 4500 imager is power in your hands. The Gryphon 4500 imager comes with a megapixel sensor which provides ultimate reading performance on any code types, all with a greater Depth of Field and Field of View. As it's a premium scanner, it can capture images with high quality and clarity to suit all your needs. The warm white illumination is not only easier on human eyes but helps to better read a greater range of barcodes on colored labels. This is especially useful when combined with optional high-density optics to enable the reading codes from LCD monitors, cell phones, smartphones and other mobile devices. You can further simplify the operator' activities by making use of the adjustable multi-position cradle. This provides the flexibility of using the imager in presentation mode to read the codes without the need to pick it up, all while it's charging. The Gryphon 4500 imager comes with a unique 4-dot aiming pattern with a center cross. This clearly defines the reading zone of your scanner and guarantees a perfect aim with every scan. When you have the tricky job of selecting a single barcode from multiple items
