

## Magellan 34xxVSi

The innovative Magellan 3410VSi and 3450VSi on-counter scanners from Datalogic are simple to use and bring best-in-class benefits to your operations. While outwardly identical, these products offer different levels of performance to suit all of your needs. The Magellan 3410VSi is an entry level imaging scanner, aimed to replace the best-selling 3200VSi product. The 3410VSi provides powerful performance at an attractive price. If you need more processing power and faster throughput however, the high-end Magellan 3450VSi has the best scanning performance of any single plane scanner on the market. These scanners work well in a variety of applications, including retail point of sale, pharmacy, drug verification and a hands-free component verification. The extra-large reading area and sweep scanning provide fast and easy reading from a variety of barcodes and other sources. The Magellan 3410VSi and 3450VSi bring greater efficiency to your business. The Magellan 3410VSi and 3450VSi were meticulously crafted to provide performance, comfort, and durability in a compact, ergonomic design. Regardless of the application, users get a high-quality piece of hardware that will give many years of outstanding service. Equipped with the latest decoding technology and solid-state electronics, these Magellans handle high speed scanning operations with ease. They also feature the ability to read Digimarc codes, ensuring that users are future-proofed against a changing market. Their tough design withstands rough use, spills and is ESD protected up to 25kV. Like all of the Magellan products, these units are tough, long-lasting, and versatile scanners. The compact form factor of these vertical single plane scanners allow for easy attachment of the unit to a counter, wall or even inside a small self-checkout system. The USB auxiliary port makes adding a customer service scanner quick and easy. Customers will have an improved shopping experience scanning their loyalty cards while
