

MC40 Touch

Today, it's important to provide an experience that will impress demanding and technology savvy retail and hospitality customers. Put the pocket-sized MC40 mobile computer in the hands of your staff, and you will. The MC40 is sleek and stylish. It is also a mobile computer that is designed for the enterprise. It is secure and rugged and has a user replaceable battery for guaranteed availability — all shift, every shift. When you give your staff the new, sleek MC40 EDA, everything they need to serve customers is right at their fingertips. They can use it to take an order, provide customer information or check if an item is in stock — all without ever leaving the customer's side. The result? Superb service, more productive staff and higher revenues.

Description

Real business-class durability

You get the durability that Motorola Solutions is famous for — the MC40 simply works, even if your employees drop it, bump it or use it in a dusty backroom.

Android fortified for the enterprise

A series of new features transform Android from a consumer operating system (OS) to a true enterprise-class OS.

Powerful application performance

An 800 MHz processor, 8GB Flash memory and support for 802.11a/b/g/n wireless LANs provide desktop-like speed for demanding applications.

A large 4.3 inch touch-only display

The generous display size provides the screen real estate to support information-intensive applications, such as product comparisons.

Comprehensive and secure payment processing

The integrated magnetic stripe reader allows associates to scan a credit, gift or loyalty card. And with an encrypted head, information is never visible in the clear, helping meet PCI regulations.

Customize with your brand

Pick the color for the bezel and add your logo to promote your brand. This enables customers to instantly identify your associates and discourages device theft.
