Description

ENTERPRISE VALUE WITHOUT COMPROMISE FOR FIELD MOBILITY

Regardless of whether you are a small or medium-sized business, or in an emerging market, or if your field workforce is repairing equipment, writing sales or picking up and delivering shipments, they all have one thing in common — they are your daily touch point with your customers. How fast and how well they perform their jobs directly impacts your revenue, customer satisfaction, customer retention — and the cost of your labor pool.

The MC45 is the affordable way to give your workers the real-time information they need to get the job done right, right on the spot, preventing lost sales — and lost customers. Your workers get the sleek consumer styling and one-handed operation they expect, along with the features, durability, security and manageability your business demands.

- **Class-leading ergonomics**

Zebra's award-winning Industrial Design team developed a pocketable device that is easy to hold, while key size, key placement and display size makes it easy to see and easy to use.

- **True field durability**

The MC45 is built for life out in the field, able to handle drops, bumps, spills, dust, vibration and the thermal shock that often occurs as workers travel from a climate controlled vehicle to the outdoors.

- **Advanced 1D scanning technology**

Our industry-leading 1D scan engine with Adaptive Scan™ technology makes scan-intensive tasks easy. A broad scanning range allows the easy capture of bar codes from near contact to as far as 15 ft./4.5 m away, even if they are dirty, damaged or poorly printed.

Improve customer service and workforce productivity out in the field

Your field workforce is your daily touchpoint with your customers. Whether they are repairing equipment, writing up sales or picking up and delivering shipments, how well they are enabled to perform their jobs directly impacts your revenue, customer satisfaction, customer retention and your growth potential. The MC45 is the affordable way to give your workers access to the real-time information needed to get the job done right, right on the spot — preventing lost sales and lost customers.
