

Memor K

This pocket-sized data capture companion will become essential whether assisting sales on the shop floor, or back-end receiving in the warehouse. The Memor K is the latest member of the bestselling Memor family of PDA devices. It is conveniently priced and comes equipped with a physical keyboard so you can use it in all environments and for any application. While it may be small and fit easily in your pocket, it really does pack a punch. With its powerful 2 GHz octa-core processor and 3 GB of memory, the Memor K will comfortably run your most demanding applications. It's class-leading specifications and small form factor make the Memor K the only device you need to equip your complete workforce with.

Description

Use effortlessly in any environment

The physical keyboard helps improve productivity, especially as it is backlit and allows for very fast data input. Every data capture application is possible. In [retail](#) this could be [inventory](#), [price checks](#), [assisted sales](#), and [mobile point of sale](#). In [Transportation & Logistics](#), its uses can be for keeping track of inventory as well as picking/packing and [shipping/receiving](#). [Manufacturing](#) for production and [quality control](#), as well as [track & trace](#). Finally, in [Healthcare](#) it can be used for [bedside care](#) and used in [pharmacy](#) and [labs](#). The large 4-inch screen makes it easy to view and run your apps. A combination of 2 user-configurable side buttons, balanced ergonomics and tough IP54 protection capability with 1.2 m drop resistance make this the ideal device for one handed use.

Have real power at your fingertips

The **Memor K** may be an entry level priced device, but it boosts a heavyweight spec comparable with high end **PDA**s. It's 2 GHz octa-core processor and 3 GB memory deliver the computational power to run demanding applications smoothly and multi-task effortlessly. It comes bundled with the industry standard **Android™ 9 operating system**, providing class-leading user experience. You need not worry about running out of memory space either, as it also features a micro SD memory card slot for up to 64 GB additional memory. The 3,800 mAh rechargeable battery will meet the demands of continuous operation for the duration of any shift, and you simply swap out the battery at the start of the next shift.

Work smarter with a class leading PDA

The **Memor K** features **SoftSpot**, Datalogic's patented user-definable 'floating soft-trigger' that can be located at the most comfortable position on the large touch display. It provides an easy method to trigger any application as well as the 2D imager or 8 MP rear camera. The camera is especially useful in helping workers capture images for proof of repairs, damages, and condition of products. There is no need for Ethernet cable data transfer as the **Memor K** has high-speed built in Wi-Fi 802.11ac. Charging is easily achieved via a USB-C charging port that can be used as a stand-alone or as part of a docking cradle. The benefits of all this technology are what makes the **Memor K** a leading player in the crowded [PDA](#) market.
