Description

THE AFFORDABLE, WEARABLE MOBILE DEVICE

Help every one of your associates better serve customers and nurses and clinical staff improve patient safety and staff productivity. The SB1 smart badge is worn around the neck, arm, or on a belt, and integrated barcode scanning helps streamline task execution, improve task accuracy, answer customers' questions in real time. And with push-to-talk, workers can easily get an instant answer to an urgent question. The result? A more efficient staff who are ready to turn shoppers into buyers. And a higher standard of care that delivers a better patient experience.

- **Small, lightweight and wearable**

The compact, light SB1 is easily worn on a lanyard, belt clip or armband — where it is comfortable and always available.

- **Easy to read — everywhere**

The 3 in. E Ink® Pearl display is easy to read in virtually every lighting condition.

- **Full shift power**

The low-power E Ink display provides over 14 hours of battery life from a single charge — enough to power more than one shift. In badge mode, the screen can display an associate's picture and name or advertise a promotion — yet the display draws virtually no power at all.

THE AFFORDABLE, WEARABLE MOBILE DEVICE DESIGNED FOR EVERY RETAIL ASSOCIATE

Help every one of your associates better serve customers with the SB1 Smart Badge. A brand-new category of mobile device, the SB1 is worn around the neck, arm, or on a belt. The device allows shoppers to identify associates. It also enables associates to scan barcodes and answer customers' questions on price or inventory, and with a task management application, workers can access their own task list and supervisors can monitor task status — all in real time. What's the result of a smart badge? More productive associates who are ready to turn shoppers into buyers.
