

Symbol DS3578

3578 Cradle The Symbol DS3578 Series of rugged, cordless, omni-directional 1D/2D imager scanners bring comprehensive, high-performance data capture to harsh industrial environments. Engineered with breakthrough digital imaging technology, this scanner family delivers extremely fast and accurate data capture of 1D/2D bar codes, direct part marks (DPM) and images, and supports Item Unique Identification (IUID). Integrated Bluetooth provides cordless freedom, improving productivity. Three models are available: DS3578-SR: 1D/2D bar codes DS3578-HD: 1D/2D bar codes; optimized to capture very small, high-density 2D bar codes DS3578-DP: 1D/2D bar codes; DPM marks; IUID support.

Description

Ability to read both 1D and 2D bar codes, and capture and transfer images

Increases productivity by providing one device that can read all industry-standard bar codes and capture images.

Powerful 624 MHz processor, fast sensor shutter speed and patent pending fast pulse illumination

Superior performance on 1D and 2D bar codes, improving productivity in a wide variety of applications.

Government grade security: FIPS 140-2 validation

Meets the most stringent federal government and industry security regulations

IUID-enabled (DS3578-DP only)

Ability to understand IUID constructs, and automatically separate and send the required information to your application.

EZ-DPM software for Direct part Mark capture (DS3578-DP only)

Enhances quality processes and improves lifetime product traceability with this highly advanced DPM software.

Ability to capture high density bar codes (DS3578-HD only)

Increases productivity by enabling users to read high density 2D bar codes in addition to all industry-standard bar codes.

Integrated Bluetooth Class II, Version 2.1

Cable-free convenience; secure wireless transmissions; reduces repairs due to cable failure.

Rugged design: IP65-rated sealing; withstands multiple 6.5 ft./2 m drops to concrete

Ensures maximum reliability with less downtime.

Multiple on-board interfaces and universal cable set

Ensures flexible connectivity with different hosts; provides investment protection.

Exceptional motion tolerance; omni-directional scanning

Enables extraordinary scanning speed for all bar codes, increasing throughput and productivity.

7-to-1 pairing

Pair seven scanners to a single cradle, greatly reducing cradle costs (scanners and cradle must be FIPS validated).

Supports 123Scan2 scanner configuration tool and RSM (Remote Scanner Management)

Enables rapid and easy customized set-up; enables centralized management, lowering IT expenses.
