

TC55 Touch

To get the job done, your field workers need a rugged, reliable device to provide remote access to real-time data. They also need a device that is easy to use. Introducing the TC55, the pocket-sized, all-touch mobile computer that has it all. The TC55 Touch Computer marries rich enterprise features with smartphone usability and form factor. For example, workers can capture practically any type of data — from bar codes and signatures to photos, videos and NFC — improving on the job efficiency and customer service. The screen is optimized for Enterprise viewing, helping ensure the battery lasts a full shift. And with a drop, tumble and environmental sealing specification you can count on, it has the durability required to serve your field workers for years.

Description

Standard or Professional Configuration to meet your needs

Both built on Android Open Source (AOSP), the Standard Configuration comes with Google Mobile Services (GMS), a suite of integrated Google applications standard on most smart phones - ideal for workers that depend on apps such as Gmail or Google Maps. Our Professional Configuration ships without GMS, promoting greater privacy and security of personal information by preventing location tracking and data collection — providing a solution for businesses with strict security policies.

Advanced capacitive touch screen that works virtually anywhere

The 4.3 in. high-resolution display isn't just bigger, it's significantly better. Based on cutting-edge HAST LCD technology, the screen is brighter both indoors and outdoors, all while consuming substantially less energy (just one reason why the TC55 has industry-leading battery life). At 700 NITs, it has outstanding indoor luminance, and the screen's transreflective feature actually leverages direct sunlight to improve its image

clarity, making it ideal for outdoor viewing as well. Furthermore, the capacitive touch panel dynamically adjusts to the current environment, enabling it to work with or without gloves, wet or dry and with your finger or a stylus.

Service from the Start for enhanced peace of mind

Included as standard when you purchase the TC55, Service from the Start provides normal wear and tear repair coverage with a dependable three-day repair turnaround time, along with additional service options. No matter where you are located, our global support infrastructure helps ensure expert repair, reliable turnaround times, along with prompt technical telephone, email and online support.

Fortified for the enterprise with Extensions by (Mx) Motorola Solutions

New features that transform Android™ from a consumer operating system (OS) to a true enterprise –class OS, including Security, device management and support for enterprise data capture capabilities.

Integrated Scanner and Imager for Fast, Accurate Data Capture

Increase productivity with the integrated 1D scanner, an optional 1D/2D ring-style Bluetooth scanner, an 8 MP camera and Near Field Communications (NFC), so workers can quickly and easily capture virtually any type of data at the press of a button.

Expanded enterprise software for rapid deployment

A wide variety of applications ready for Android are available to help businesses in many vertical markets improve mobile workforce efficiency. And because Motorola has the broadest portfolio of Android devices and application partner channels in the industry, the list will continue to grow and expand your sales opportunities.

Leveraging over 80 years of Motorola voice leadership

From police to firemen, people all over the world rely on Motorola's clear sound technology for life-saving decisions. The TC55 leverages this expertise to produce unparalleled voice output based on dual front-facing speakers that yield four times the volume of popular smartphones from Apple and Samsung. Coupled with dual microphones with precision, noise-cancelling technology, the TC55 delivers outstanding clarity at both ends of the call, even in noisy environments, for a no-compromise voice solution.
